Advantages

of setting
WARM STONE PACK
in your home and facilities

Easy for carrying

Cordless warm stone pack can be used at any place "while doing something".

Keep the body warm from inside

Far-infrared rays will keep the body warm from inside by using WARM STONE PACK for 15 to 20 minutes.

Microwavable

Heating by microwave makes it possible to be used for urgent treatment.

Fuss-free

WARM STONE PACK doesn't require any special techniques to use.

Easy for setting and maintenance: Use Cordless WARM STONE PACK everywhere

HEATRAY WARM STONE PACK is a bedrock hot pack, which a far-infrared emitting natural bedrock stone is formed to be fitted to the body shape, and then put in the special heat-resistant bag. It is easy to carry due to its cordless structure, and can be warmed by the microwave as well as the warmer. You will feel the heating effect easily and quickly at any time or any place.

Suggested uses of HEATRAY WARM STONE PACK

It can be used at a variety of facilities to enhance the service activities further.

acupuncture/osteopathic clinics

Day-care facilities

Recommended: Esthetic salons / Gyms / Golf clubs / Households
Installation cases of WARM STONE PACK are posted on our website.

Features of HEATRAY WARM STONE PACK

Body-fitting & cordless hot pack

There are 3 sizes of the portable hot pack. It can be used "for warming the belly while sleeping," "for warming stiff neck/shoulders while doing the foot bath" etc. You can feel the comfortable warmth at any time or any place.

Transposable double-layered bag/Easy for washing

The closed inner bag containing natural stones are in the zippered outer bag. WARM STONE PACK is easy for replacement and laundry, so is kept to be cleaned.

Carefully selected natural bedrock stone, which we call "Onko Stone," is used

"Onko Stone" emits highly-efficient far-infrared rays and preferentially releases a limited wavelength range of growing light which is beneficial for health maintenance. This natural ore is an essential of HEATRAY WARM STONE PACK, which makes "the body become warm from inside and less likely to get cold" and generates "the comfortable warmth."

Data: Far-infrared rays emissivity in Naturak Ore
Measured by Japan Dyers' Inspection Institute Foundation
6-20µm Average integrated emissivity

Natural ore (Onko stone)	93.0
Natural ore A	87.1
Natural ore B	89.2
Natural ore C	88.4

"Onko Stone" is also used on Waterless Footbath "OMOTENASHI ASHIYU."

The warmer supplied by the reliable Japanese manufacturer

Depending on seasons and environments, the temperature can be set at the range from 30 to 90 degree Celsius by microcomputer control. There are 3 slide-out shelf boards inside the nurse cabi. 6pcs (for belly & back) and 4pcs (for neck & shoulder) of WARM STONE PACK can be stored per one shelf board.

*In case that the heating time to be reduced, using with microwave is highly recommended.

Microwavable

Heating by microwave makes it possible to be used for urgent treatment.

- For the guide, the comfortable warmth is provided for 1.5 to 2 minutes heating at 600w by the microwave (this may vary with the seasons or environments.)
- It takes about 1.5 hours heating by the warmer even in the summer time, so using the microwave beforehand will reduce the heating time.

Fuss-Free

WARM STONE PACK doesn't require any special techniques for setting. You just put WARM STONE PACK into the warmer, turn it on, and set the temperature.
